

How to Update Xcruiser Finder XS 9500D by PC

Download the Software from Website www.sw4us.com

In order to update your finder software you need to have the flowing things

1. USB to RS232 Cable (this Cable in Included in Xcruiser Finder Box)
2. PC with working RS-232 Comport

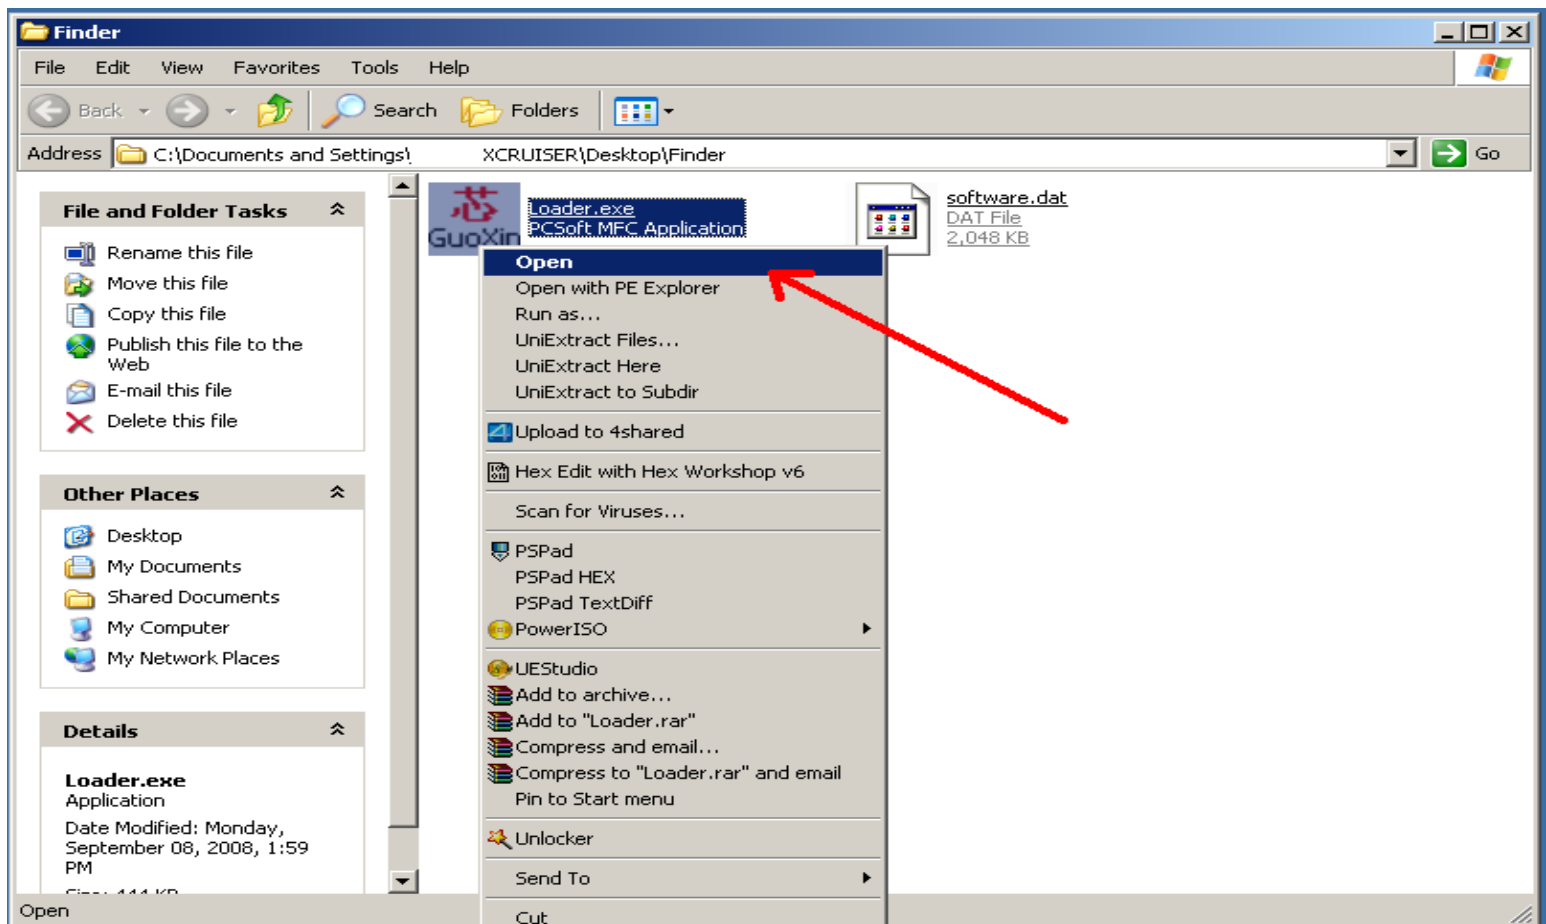

Now make the connection as per the picture below

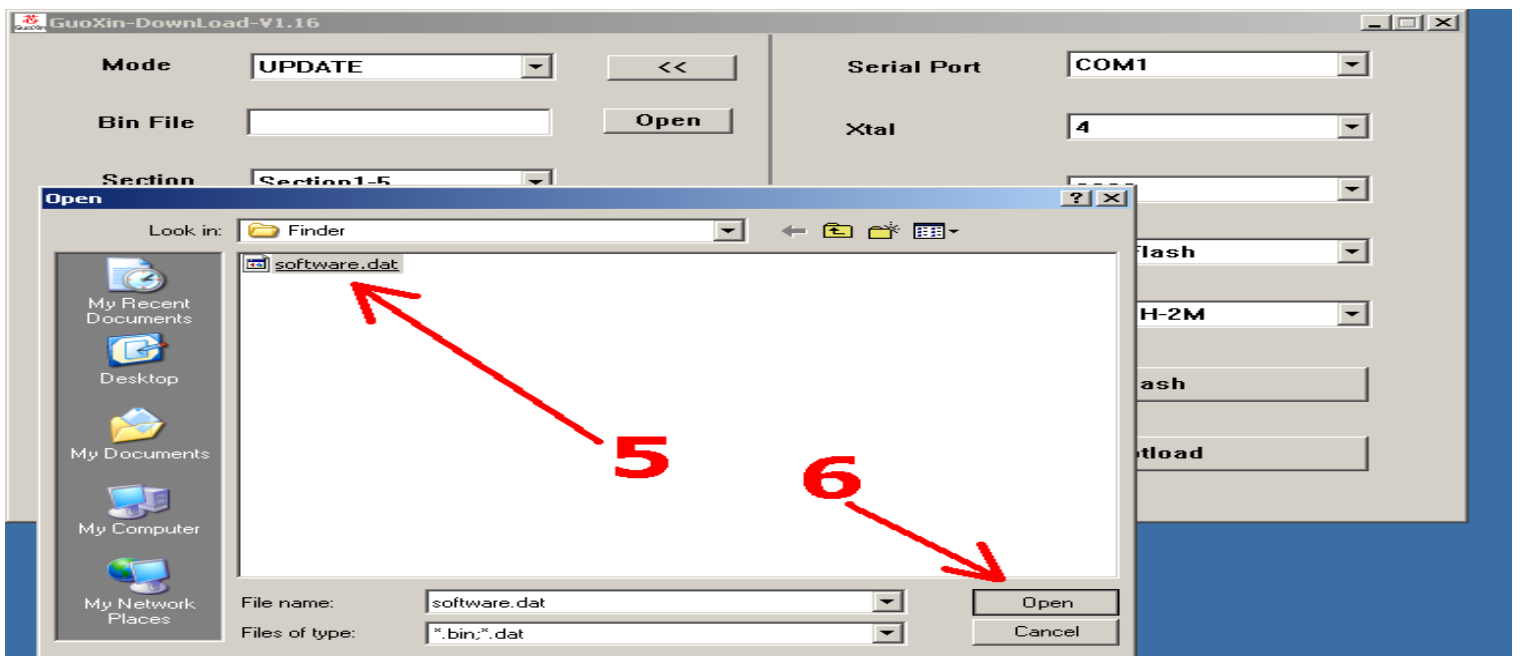

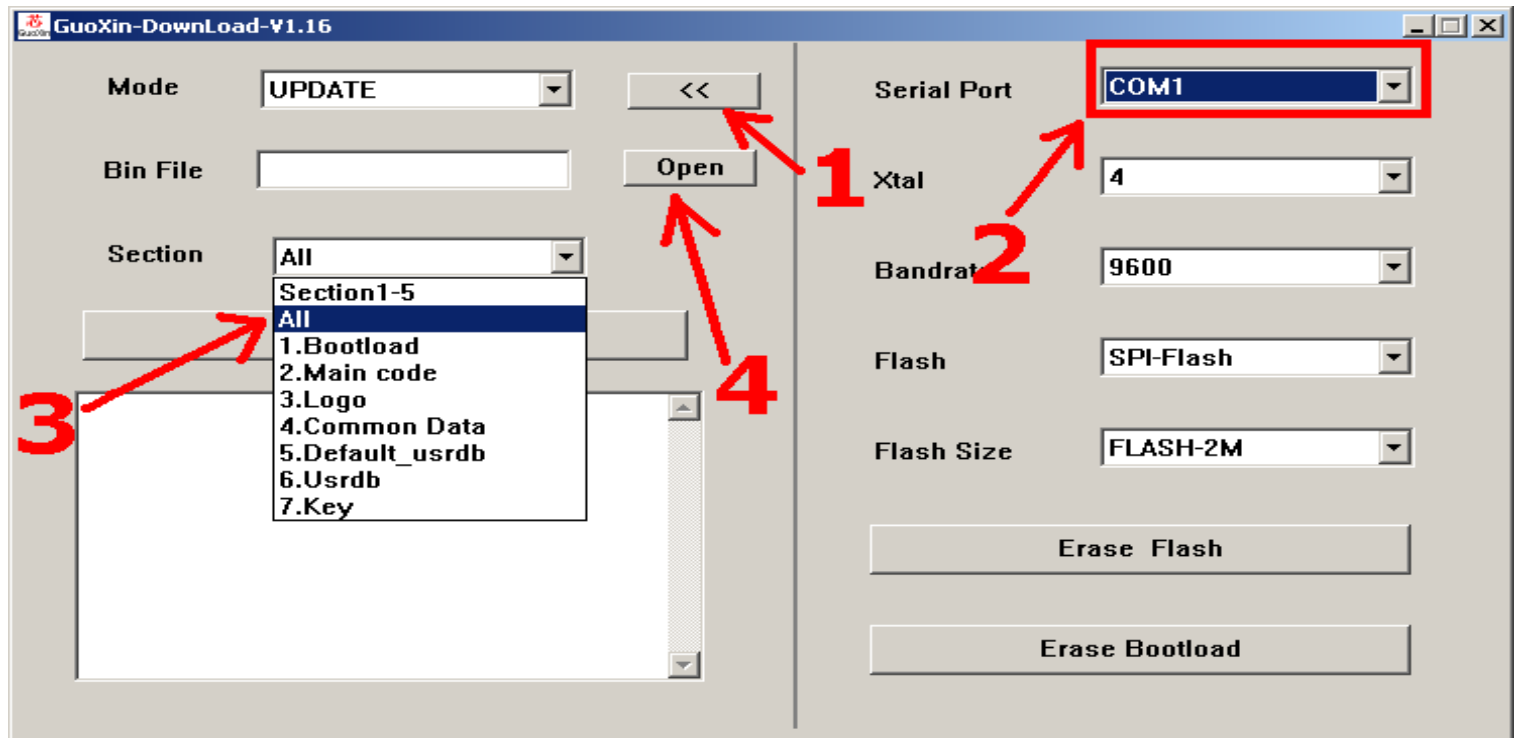

NOTE:-While making Connection Keep your Finder Off then make connection And make sure finder is fully Charged better Connect power Adaptor

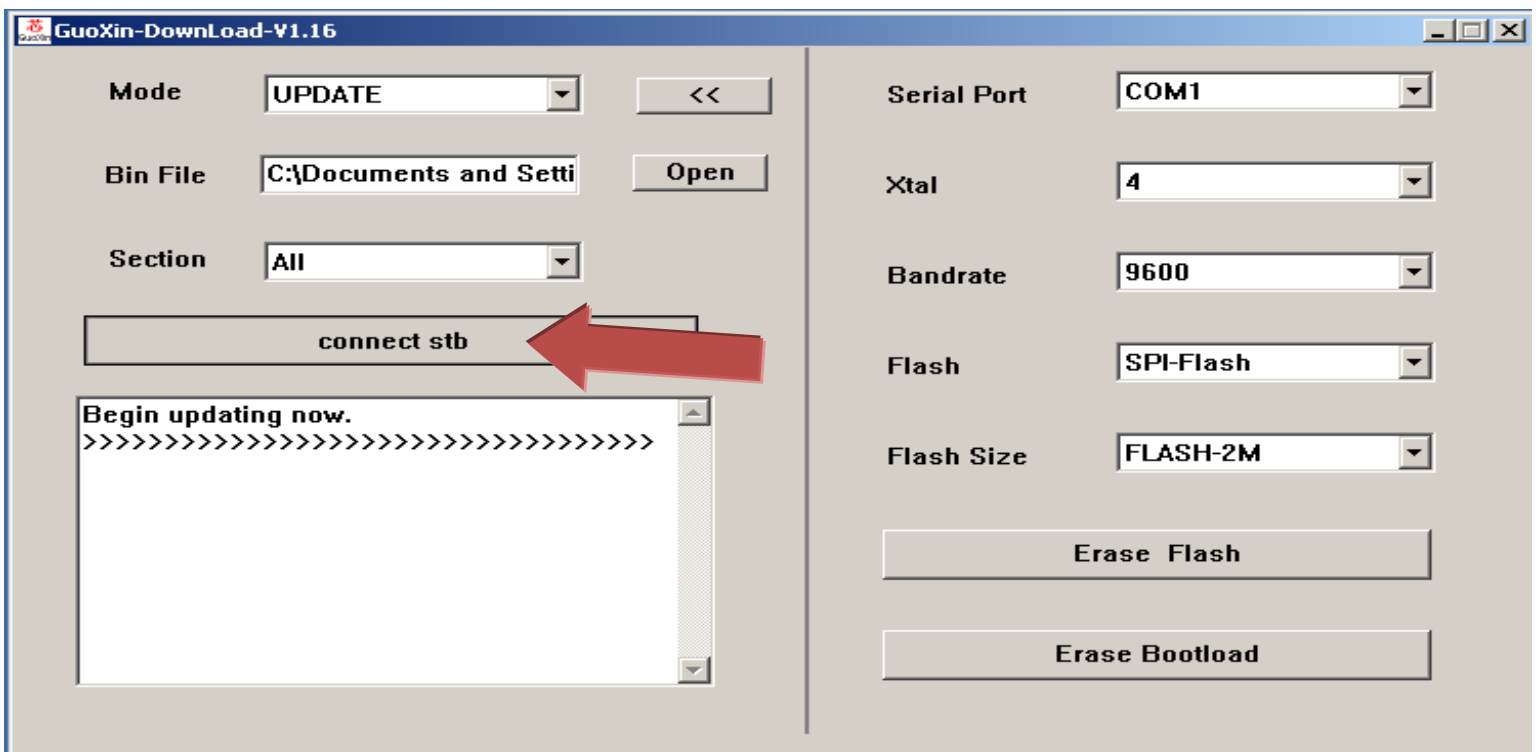

Now from the Computer open the "Loader.exe"

Press “ << ” on the loader to bring Comport option, then select working comport, then click on “Section” and select “All” then click “Open” to select the software file, follow step 1 2 3 4 5 6

Now click on "connect stb" button to Start process

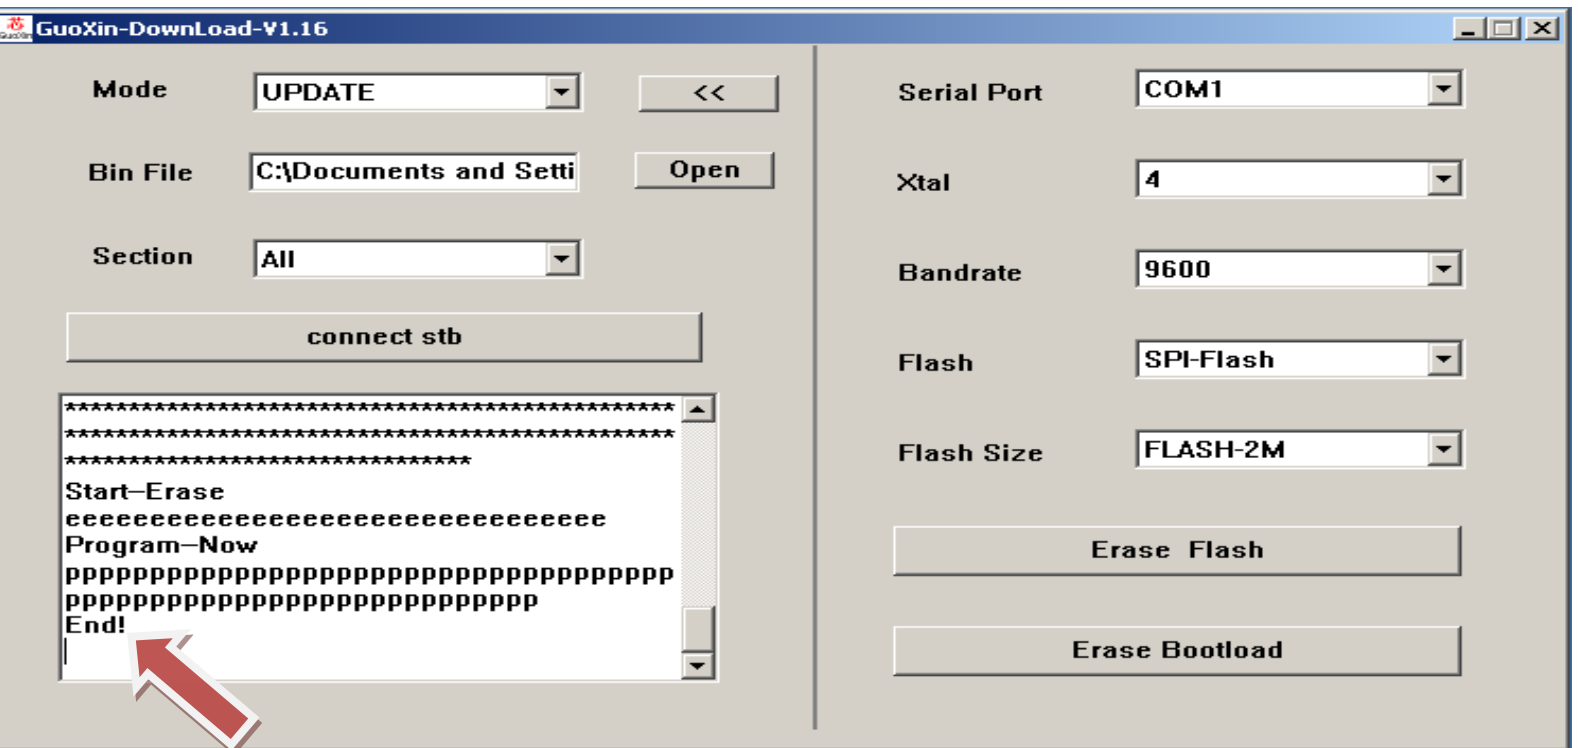

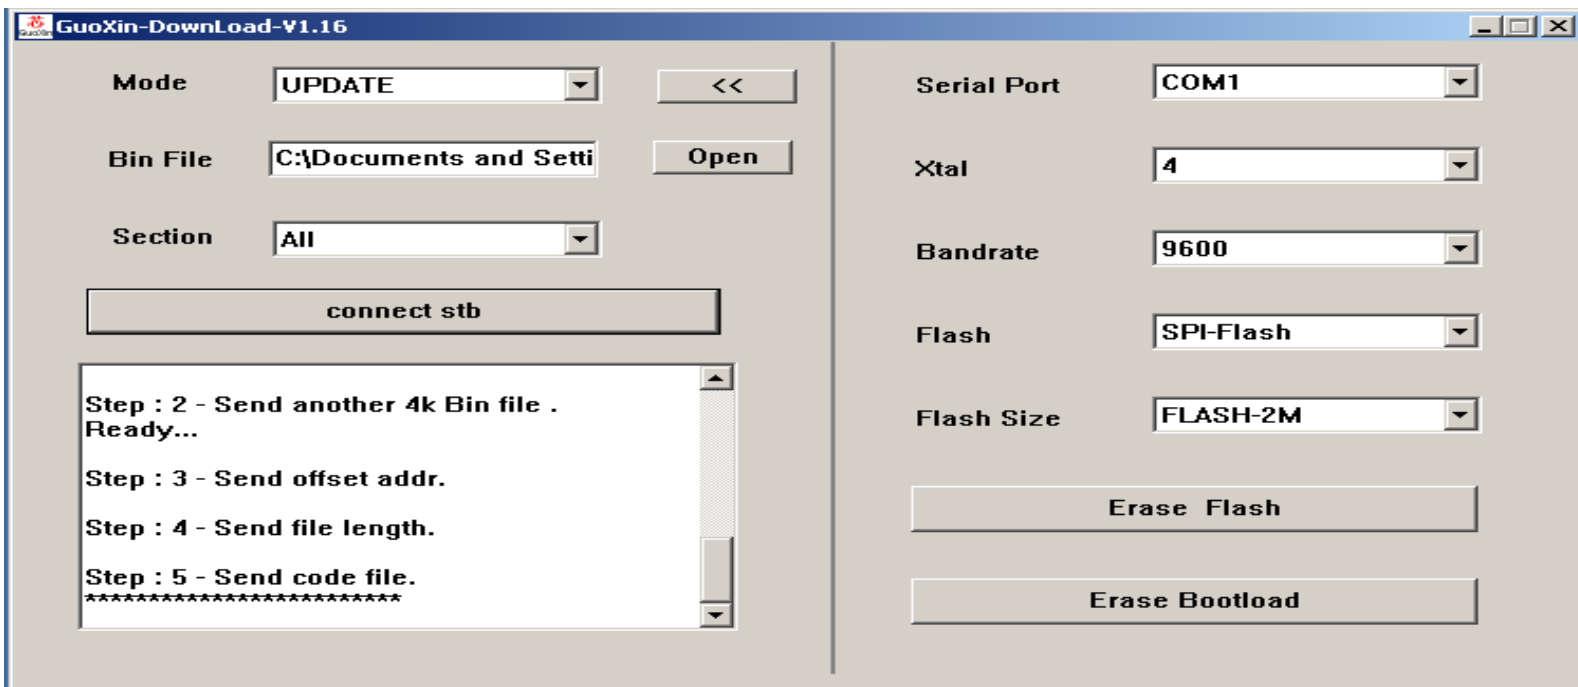

Now Press Power Button and Turn On Finder by press Power Button

Now update process in Started you can see

Step: 1 Step: 2 Step: 3 Step: 4 Step: 5 and ***** are coming
wait until it show "End"

When you see "END" it means Update is finish

Now turn off by pressing power and Turn it on that's all
